

Si tienes tu libro realiza las actividades en el, de lo contrario realiza las actividades en tu cuaderno. Guíate por este documento, ya que aquí se indica lo que debes hacer.

Key words

- highlight resaltar
- significant significativo
- overlooked ignorado
- tip consejo

Strategy in mind

- **Skimming**
Reading quickly to identify type and purpose of the text.

Smart reading

- ¿Cuál es el propósito del texto?
 - To warn.
 - To criticize.
 - To instruct.
 - To describe.
- En cuál de los consejos puedes encontrar una referencia a...
 - using a highlighter?
 - summarizing key ideas?
 - the technique being a good tool for language study?
 - organizing information for exams?

Focusing on reading

Fecha guía 03 al 14 de agosto

- Observa las imágenes y elige un título para cada consejo, luego lee el artículo y confirma tus respuestas. (hay un título extra no debes usar)
 - A rainfall of ideas
 - Only what's important
 - A good order of ideas
 - Associating concepts
 - Making your own study notes
 - Using images
 - Getting into the habit

Consejos para mejorar tu aprendizaje.
Tips to Improve Your Learning

Study Tip 1: []
It is one of the simplest and best known study tips. It's easy to **highlight** the most **significant** parts of what you're reading while omitting the irrelevant ones. You should use a highlighter to identify the irreplaceable aspects only after you read for the second time and mark only one key sentence per paragraph and a few important phrases here and there.

Study Tip 2: []
Essentially the aim of note-taking is to summarize lectures or articles in your own words so that you can easily remember the ideas. In most cases, the key is to summarize the content as quickly as possible while not leaving out any key information.

Study Tip 3: []
A good mind map can save you many hours of study and organize information for your exams. Mind maps can be used for brainstorming, writing essays or study topics and for general exam preparation.

Study Tip 4:

Using picture cards or flashcards is a particularly effective method of learning when trying to assimilate different facts, dates, formulas or vocabulary. Subjects such as History, Physics, Chemistry and Geography are made much easier if you incorporate flashcards. Picture cards are a good way to learn new vocabulary.

Study Tip 5:

This is another study technique that is ideal for studying in groups. Brainstorming is a great way to expand every possible idea out of any topic. Just get a bunch of friends together. There are no wrong answers when brainstorming - just talk and capture the ideas; you can review afterward.

Study Tip 6:

Organizing your study is one of the most effective study skills and, ironically also one of the most often **overlooked**. Creating a study timetable gives you goals, ends irresponsibility and sets the time in which to study. Having a study timetable as you study is greatly motivational.

In short, we can use any of the above techniques to help make our study process more effective and easier. You can choose any of them depending on the type of result you want to achieve. There are no right or wrong study techniques - you just select the one that is the most adequate for your purpose. Some of them are better to study sets and lists, others help us organize our habits better, while others simply provide us with the correct ideas.
