Smart reading

1. Enumera los pasos en el orden correcto

- Add transitions and drag them onto the Storyboard.
- Click and drag all the clips you selected onto the Storyboard.
- Open your file or movie.
- Select a song and drag it down to the "Timeline".
- Add video effects and drag them on the star on the corner of the clip.
- Click "Save" to your computer or to a CD / DVD.

2. Encuentra palabras en el texto que signifiquen lo mismo que ...

- a film
- to use the mouse
- the lowest part
- entire
- jobs in a film
- content
- the people who make a movie

VI Add music or cut the clips by clicking on "Timeline" also at the bottom of the screen. When you want to cut some time from the clip, click the half triangle at the side of the clip and edit how long you want the scene.

VII Go to "Import Audio or Music", select a song and drag it down to the "Timeline". You can also cut time by clicking the triangle and dragging it to make it as long as you want. You can have just one word, chorus or the whole song.

VIII Add title or credits by clicking on the link on the left panel. There is a big empty bar on the form; you can put either the title of the movie or the credits. On the right side of the form, you should write people's names according to positions (e.g.: director, producer, character).

IX Click on the "View Timeline". As a result, you will see the timeline with the song, the title, the clips and the effects and transitions. Then you can view the movie you created by pressing "Play" on the left panel.

X If you are satisfied with your movie, click "Save" to your computer or to a DVD. As soon as you do that, your movie is ready. If you want to share it, you can upload it on any social network.
